Solar capacity may reach 3,645 MW

New Delhi: Country's solar installations are expected to reach around 3,645 MW in 2016, clean energy consultant Mercom Capital Group said on Tuesday. "Mercom forecasts about 2,150 MW in solar installations for the 2015 calendar year and expects installations in 2016 to reach approximately 3,645 MW," it said. "There have been a number of important energy related policy announcements recently, with increased activity on the ground with tenders and auctions beginning to occur more frequently," Mercom Capital Group CEO and co-founder Raj Prabhu said. — *PTI*
